Forecast for Tuesday 13 Jun 2023

Weather: Risk of some lingering heavy, perhaps thundery, showers through the early hours, this risk passing before dawn. Also very patchy low cloud or fog in valleys is possible at first, soon clearing after dawn. Thereafter, a largely dry, fine and very warm day with any early cloud above the hilltops breaking to leave plenty of strong sunshine. Very low risk of an isolated thunderstorm developing during the afternoon, but much less likely than previous days.

Chance of cloud-free hill tops above 800m: 80% in the early hours, soon becoming near 100%.

Low Cloud and visibility: Generally good visibility, with views of distant hills. Perhaps briefly very poor in any early low cloud or fog. Temporarily poor in any isolated heavier showers.

Valley	19/19	18/18	19/20	23/22	25/24	25/24	24/23	21/19	19/16
Freezing Level*	3200m	3100m	3000m	2900m	2900m	2900m	2600m	2800m	2700m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels in strong sunshine and very warm temperatures mean that appropriate sun protection and adequate hydration is recommended.

Forecast for Wednesday 14 Jun 2023

Weather: Another fine, dry and very warm day with long spells of strong sunshine. Any patchy cloud well above the hilltops.

Maximum wind: Easterly or southeasterly 10-15 mph.

Chance of cloud-free hill tops above 800m: 100%

Low Cloud and visibility: Good visibility, with clear views of distant hills.

Temperature: **Valleys:** Plus 12C becoming plus 26C
At 800m: Plus 16C
Freezing level: Well above the hilltops
